These are personal point of view of life conceived by meta-human in a physical universe. Simply, the life of human being and deity/supernatural beings (Angels of God).

Life in Metaphysical Origins, Game Space, Physical Walls and Physical Course.

PROLOGUE

A meta-human (deity) of continuing life and being of human descended from a planet called Unitusian. In the land of Gahana. The land of Gahana is a place made up of trees, beautiful natural things, the likes of precious metals(gold, bauxite, etc).

The physical universe is a place where activities relating to the physical body interrelate that involves people touching or hitting each other a lot. The conceptions of dualism and realism is in play.

An origin of joy leading to happiness is the thing of love by deity. God said love your neighbour as yourself.

CHAPTER 1

SPACE GAME

"The visit of deity is for a reason."

Once upon time, a meta-human or deity of continuing life and being of human descended from a planet called Unitusian to the land of Gahana. The land of Gaahana is a place made up of trees, beautiful natural things, the likes of precious metals(gold, bauxite and more) and kind people.

The visit of deity is for one reason and that is a wonderful young man have performed well in a hunt for a clever person. The deity has being trying to contact the young man but not successful in a countable number of times. After a Unitarian year, he decided to give the game away by visiting the land. During the competition, it is believed that one

member of the family did give the young man aw meta-face because of the danger involved in the hunting process.

The consequence of this is that the young man has a meta-head- Head about Head. The implied is a Space Game. Be it a myth or fact, it is believed that it is a place of wonder, power and magic.

❖ *7*

The space game is an area where everything that is secret is placed with *wonder, power and magic*. The problem created is that the secrets of the place is being disclose to the other members of the family. The member of family is always discussing the wonders, powers and magics to other people without taken into consideration the concerned issues.

The deity does not speak nor talk of anything and it evoked the unsolvable problem. The investigation into the

space game has begun. The young man did sort for explanation from the member of family and it came to be realised that deities are always fulfilled and does not need anything in life. The deity holds it a duty to pass the achievements of their next generation and the brain made up of signals(electrical) does use energies that is exposed to it. The power of the achievements that are transmitted to the brain can cause one to be completely fulfilled. The mind of deity is the source of power needed to base one's intellect. Deity of a meta-man descends to horn the success of the new and old generations. It is believed that people of Gahana have taken a critical look at these facts and concluded that the past should be passed to the old and new should be kept with the young to the very end of their life. The deity did find problems with the conclusion. One is that the powers cannot be regenerated unlike wonders and magic. Deities do not speak nor talk of anything. If one gets the powers of a kind

of deity then the person has to communicate the messages in the past of the ancestors. The wonders amaze the recipient of the deity. Deities do communicate with the voice of the intellect and horns the past by reading from the scenes of the mind of the young. The voices of the intellect does tell does tell the story. The mental process is a powerful and essential thing to the young mind. The flow of scenes cur renting through the mind can be resisted if the mind of the young does not have something to bind the scene with. An unsolvable problem in the space game. The mind is filled with ideas from subjects of various discipline. If a mind sees a car in a scene of the current scene the it is the subject of automobile that comes into one's mind. There is a mental problem if there is no automobile idea in the mind to bind the current scene with. Mental current is the flow of scenic ideas through the mind can be resisted by an unbind scene. The mental resistance is the resisting potential of unbind

scene. The mental current and the mental resistance makes up the mental power of the young mind.

The perceived mental current is considered as good or bad by the young mind. Even a meta-head cannot determine for the other what traits of good or bad are deemed. There is a chance that one will withdrawn from the current mental scene. The young good mind will allow the greater mental powers than that of the bad mind. This in turn means that there is a greater mental current for the young good mind than the young bad mind even on the same resistance.

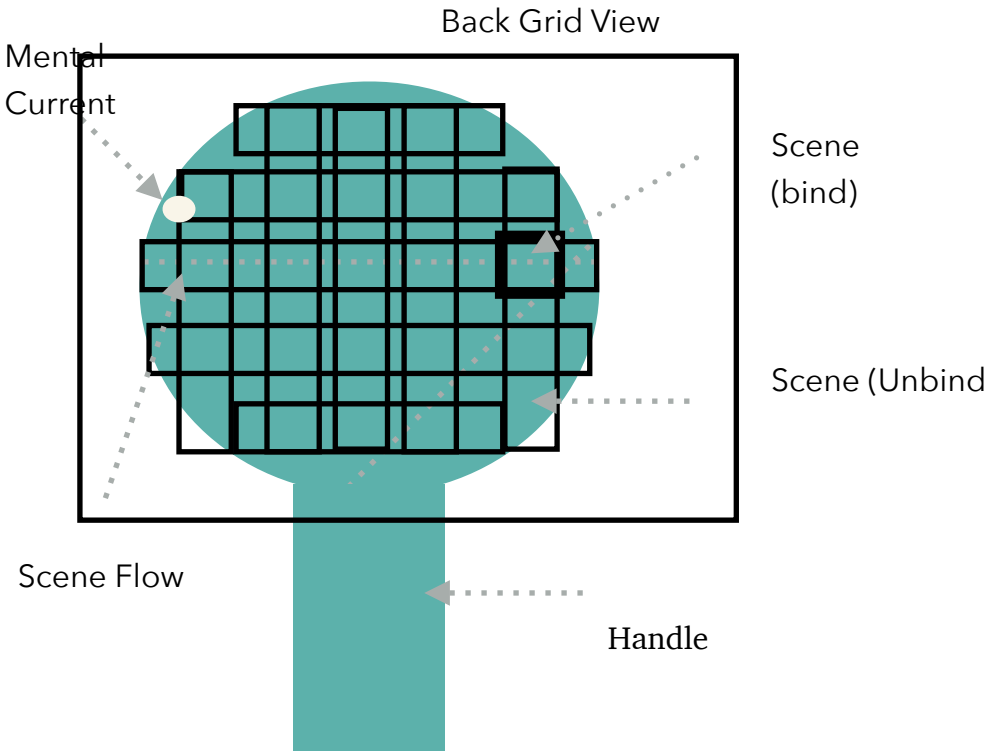
The mental current for the young good mind and the young bad mind is a square. This means that the mental current is the same product of mental scenes. The bad mind has a less hard and thick skin than the good mind.

Squash is an unsolvable problem of space game.

A real sense of squash an indoor game in which two players use rackets in order to hit a small ball against a wall. The mental sense of squash will be that the players (bad and good minds) use mental power in order to hit a small mental current against a mental resistance. A large hard hit will cause a red face. The sense of a bad mind will use its mental power in order to hit an unbind scene in a small mental current against a mental resistance. The good mind will use its mental power in order to hit an unbind scene in a small mental current against a mental resistance.The unbind scene in the mental current will be damage by the pressing or crushing. The unbind scene will lose its normal shape. The influence that the idea will be develop will be destroyed. The bind scenic in the current mental situation will push the or against mental resistance so that they fit into a game of intellect. In special cases where there are many scenic ideas

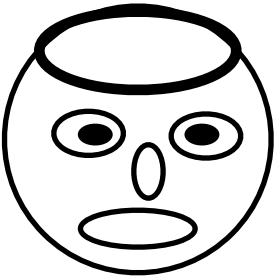
in a mental current scenario, a good mind can turn to be a bad mind. Matters of effectiveness will be the issue of a good mind turning into a bad mind. The difficulty of fitting a big mental picture or scene into a game of intellect can termed as a *good mind or bad mind*.

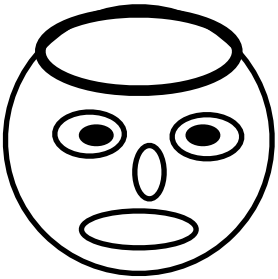
A Racket of Scenic Grid.



The bind mental current and unbind mental current is a square of bind scene and unbind scene respectively. The product of a mental scene is the square of the bonded or unbounded mental current. The back scenic grid differs from the front scenic grid by a handle. The back scenic grid is a place of wonder, power and magic at the back of of the head whiles front scenic grid places it three three things at the fore head. The back scenic grid handles large scenics better than the front scenic grid. The front scenic grid has more power to handle a number of scenes than the back scenic grid. The resisting potential of the unbounded scene will normally distort the shape of the head. The curves of a racket will be the best fit shape. The wall is the square of the bonded or unbounded mental current and the racket hits the ball off the mental current on the head.

Structure of Head





The scenic grid holds the scene to be bonded to the good mind. This is done by hitting the current mental ball onto the head. The mental current provides the power along the scene flows to activate the bind scene to be bonded to the mind's eye which is the visual cortex. The mind's eye then processes it and present it as photo to the eyes to see.

Deity is a mastermind of the place of wonders, powers and magics. In their masterplan, a continuing life for the beings of Gahana have been their business since the earth begin. Deities have aged over 350 years and their expertise in living on this planet is a kept secret. Any mistake on anybody's part to reveal the wonders, powers and magic of their clever hunt will get the lash as they desires.

The clever hunt is the contacted and has intelligence in everything even those placed in secret. Deities in their own

wisdom created a solution to tackle the insecurity caused by disclosures by members of families. A *student* is a member of family of a subject. The secrets of each subject is to be kept with the secretary of the student association. The continuing life sorted for by deities are matters of wonder, power and magic. Deities already knows the life of the people and passing on a new generation is the intelligent life with evoked continuing life in turn. A person sorting for life of intelligence will be good at thinking, understanding and learning. Simply put, will be a clever person.

The type of intelligent life can be *(1)bright (2)brilliant (3)clever (4)quick (5)sharp (6)smart and (7)wise*.

The bright type of intelligent life will make one intelligent and quick to understand things. The second type of intelligent life sorted for will make one extremely intelligent.

Clever life will make one able to understand and learn things quickly. The quick type of intelligent life will make one able to understand things quickly and react to them quickly. A smart sort of intelligent life will also make one able to understand and learn things quickly. The last sort of intelligent life is the wise type. The wise type will make on able to use your knowledge and experience to judge what is right or true. The voices of the intellect tells the story. The ability to communicate intelligently is an intelligent type of life.

The bright life is a way of living to make intelligent and quick beliefs of things. A brilliant life is a way of living to make extremely intelligent beliefs of things. Clever life is the third life and is a way of living to make the ability to understand and learn things quickly. The ability to have understanding beliefs of things and learn things of beliefs quickly is a clever life. The quick life is a way of living with

the understanding beliefs of things and react to things quickly. The sixth is the smart life and it is a way of living with understanding beliefs and learning beliefs of things. The last is the wise life and it is a way of living with knowledge beliefs and experiencing a judgement of right or true beliefs. A good mind living or bright life will bond to the mental scene that places the power of intelligence and the power of quick beliefs of things. The mental scene that places the power of quick beliefs of things. The mental scene that places the power to make extremely intelligent beliefs things will be bonded to the good mind living a brilliant life. A life of clever living, its mental scene will place the power of having the ability to understand and learn things quickly in the good mind. The bad mind will unbind the mental scene to destroy the influence to develop the power of having the ability to understand and learn things quickly. A quick life living with a good mind will have the power to place mental scenes t allow

one to have understanding beliefs of things and react to things quickly. A bad mind will destroy the power to live a quick life. Finally, the minded scene that place power to have understanding beliefs and learning beliefs of things will be bonded to the good mind living a smart life. A bad mind will destroy the influence to power one to have understanding beliefs and learning beliefs of things. A life of wise living, its mental space is seen will place the power of influence life on knowledge beliefs and experience a judgement of right or true beliefs on a good mind. A bad mind will unbind the power in the mental space seen to develop into knowledge beliefs and experience a judgement of right or true beliefs. The classification of intelligent life groups the wonders, powers and magics of a person. In a class living a bright life groups its wonder, power and magic on intelligence and quick beliefs of things.

Secondly, in a class of living a bright life groups its wonder, power and magic on extremely intelligent briefs of things. Thirdly, in a clever class living a clever life groups its wonder, power and magic on capability to understand and learn things quickly. Fourthly, in a class living a quick life a quick life groups its wonder, power and magic on understanding beliefs of things and react to things quickly. Fifthly, in a class living a sharp life groups its wonder, power and magic on quick to notice and understand things. Sixthly, in a class living a sharp life groups it wonder, power and magic on understanding beliefs and learning beliefs of things. Finally, in a wise class living a wise life groups its wonder, power and magician knowledge beliefs and experiencing a judgement of right to true beliefs.

A class living a bright life will group its wonder of intelligence and quick beliefs of things because they will want to think about intelligent things and quick beliefs of things so

as to know more facts and to stay away being worried. A brilliant thinker living a brilliant life will think to know more facts about extremely intelligent beliefs of things and not get worried living that life. A sense of wonder for a clever thinker living a clever life will be to think about living an ability to understand and learn things quickly. A clever thinker will not hard enough wonder at the miracle of understanding and learning quickly. A clever living a quick life will think about understanding beliefs of things and reacting to things quickly. A class of sharp thinker will be living a sharp life and will think about quick to notice things. A class group living a smart life will think about understanding beliefs and learning beliefs of things. A wise class will be made up of wise thinkers living a wise life and they will be thinking about knowledge beliefs and experiencing a judgement of right or true beliefs.

What is the real sense of living any kind of intelligent life? The real sense of living any kind of intelligent life will be :

(a) Effectiveness (b) Ethical reason (c) Impression (d) Feeling or Emotional (e) Positive Opinion and (f) Discovery. A class living a bright life will be effective on intelligence and quick beliefs of things. A class person will live a bright life just for ethical reasons like to be extremely good at a thing. Impression is a real sense that will make a class to live a bright life. Bright life brings the feeling or emotion for a class living it. Intelligence and beliefs of things generates a positive opinion for the class living a bright life. With intelligence and beliefs of things, a class living bright life. With intelligence and beliefs of things, a class living a bright life will discover. A class living a brilliant life and a clever life will be effective on extremely intelligent beliefs of things and abilities to understand, and learn things quick respectively. A class

will live a brilliant life just for ethical reasons like to be extremely good at intelligent beliefs whiles a class living a clever life just for ethical reasons will be extremely good at understanding and learning things. Impression will be the real sense that will make one to live both clever and brilliant life. Clever life brings the feeling or emotions for a class living it. A brilliant life also brings the emotions or feeling for a class living it. Extremely intelligent beliefs of things will create a positive opinions for the class living a brilliant life. The capability to understand and learn things quickly will be a generator for positive opinions for the class living a clever life.

Again, with the extremely intelligent beliefs of things, a class living a brilliant life will be discovering. A quick life, smart life and wise life will have the real sense of living a kind of life with effectiveness, extremely goodness, impression, emotion, positive opinion and discovery.

The classification of intelligent life. Groups the special attractive qualities of a person. A good mind will attract the special qualities of the mental scene in order to influence the development of intelligent life. The bad mind will destroy the mental scene so as to influence the power two live any kind of intelligent life. A class living a bright life will attract the special qualities of intelligence and quick beliefs of things. Again, brilliant living will cause a classmate to attract the special qualities of extremely intelligent beliefs. A clever life will cause a class to live with special qualities for the capacity to understand and learning things quickly. Quick life will cause a good mind to attract the special qualities of understanding beliefs of things and quickly reacting to things. A sharp living will be influenced by the special attractive qualities of quick notice and understanding things. A wise class living a wise will attract the special qualities of

knowledge beliefs and experience judgement of right or true beliefs.

Magic is a mysterious power that makes impossible things happen if you do perform special actions. Bright magic is the mysterious power that makes quick beliefs of things if you do perform actionable intelligence. Brilliant magic is the mysterious power that makes extremely intelligent beliefs of things if you do live a brilliant life. A clever magic is again the mysterious power that makes one to understand and learn things if you do live a clever life. Quick magic is the mysterious power that makes understanding beliefs of a things and quick reaction to things if you or one do live a quick life. Sharp magic is the mysterious power that makes quick notice to understand things if you do live a sharp life. Smart magic is the mysterious power that makes understanding beliefs and learning beliefs of thing if you do live a smart life. The wise magic has mysterious power that

makes knowledge beliefs and experience judgement if one do live with a wise life. Magic gives the capability to make impossible things happen. Bright magic gives the capability to make impossible things happen. Brilliant magic gives the capability to make impossible things happen. Clever magic and quick magic both provide the capability to make impossible things happen. Smart and sharp magics give the capability to make impossible things happen. Smart and sharp magics give the capability to make impossible things happen. Wise magic makes impossible thins happen with knowledge beliefs and experience judgement.

The space game is completed by the huntsman after the secrets placed in the wonder, power and magic are revealed and the mental scenes are bonded by powers of the mind. Meta-head has an implication of memory about memory. That is a good reason- Deity do not speak nor talk about

anything otherwise the huntsman will acquire some of their extreme power. Meta-head can cause a shared memory for impaired speech memory, walking disorder, lip problem, weight gain, etc. It has its own advantages like shared strength, stress-free living, etc. An impaired wonder can cause an issue for the huntsman because any memory dumping will reduce the capability to notice quickly in the secret wonders. An impaired mental power will reduce the influence for the development of the mental scenes in the mind of the huntsman. The mysterious powers in the secret magic can be totally lost in an impaired magic in the mind of the huntsman. Impossible things cannot happen anymore and there is a reduction of quick magic, bright magic, brilliant magic, smart magic, sharp magic and wise magic in the mind. Deities will not stand aside for family and unhinged persons to stop the space game but finish it for any kind of intelligent life.

CHAPTER 2

PHYSICAL GAME

"Physical body interrelates with people touching or hitting."

The physical universe is a place where activities relating to the physical body interrelate that involves people touching or hitting each other a lot. A physical game is seemed to develop in the physical universe. These physical games are played by people in the universe for reasons like making a physical contact, making things look real (realism) and able to be seen, touched or felt. The physical relationship is another interaction or activity that takes play for reasons such as physical fitness, physical appearance, physical attraction, etc.

The physical game and physical relationship are the two main unsolvable problems. Physical course is an action somebody chooses that involves people touching or hiding each other a lot. A physical course is the main source of answers for unsolvable problems. A physical course can be developed in a physical universe for a physical game and a physical relationship. A physical course will give the ways a thing should develop in a physical universe. The physical course will determine the physical treatment needed for an activity that happens in a physical game or physical relationship. A physical treatment will be needed for people who play a physical game like making a physical contact and a different physical treatment will also be needed for people who play a physical game for reasons like making things look real, able to be seen, touched or felt. A hit treatment will be needed for the physical body for games played by hitting in a physical universe. A physical fitness is the state of being

physically healthy and strong for activities the indulges in physical relationships. A match for a physical body that would involve in physical relationship is a problem in determining a fit. A physical body being suitable for a physical relationship is also a problem that needs to be addressed. The right physical body needs to be addressed in a physical relationship.

A physical course is needed to control a strong sudden physical reaction or emotion. A physical course will determine the fitness of somebody who is capable to do any physical relationship. A physical course will provide a good standard for anyone or somebody involving in physical relationship. A standard physical course will be based on the Love Big-code and love Big-code is made up of a word, and its meaning. Somebody processing a language from the standard Love Big-code will be fit physically to involve themselves in a physical relationship.

A sex controller will be in charge to control a strong sudden physical reaction or emotion towards somebody. A sex controller can cause a sneezing fit to control a strong reaction or emotion. A sex controller and sex classist can determine if somebody has the right size and right shape for a physical relationship. A sex controller can control a physical fitness by a *throw-fit*- An angry and loud voice that throws violently at somebody.

Sex habitation is a method for a physical course for somebody involving in physical relationship. The habitation will give the chance for the bodies to say whether the other has the right size and shape to involve and continue the physical relationship. A *good fit* is a physical coursework. Sex habitation do add a piece an organ spec to equip one to determine a good fit. The *small enough criterion* is a good condition to determine a good fit in a physical relationship and is determined by the entry-level habitation in an

intercourse for a small entry. If the small enough condition is held as fit then somebody is fit to stay in the physical relationship. A big enough organ spec will create an occasion that somebody cannot control the strong sudden physical reactions or emotions. It is important to get a good fit in a physical relationship. Somebody needs to be fit ti say and that is the *sex habitator*. An organ spec will specify the action to choose when hitting each organ to the other a lot. People hitting their organs (sex) on each other is a both an intercourse and a physio-course. A physio-course involves two kinds of sex organs (male and female sex organs) in close action and hitting each organ to the other a lot. An intercourse involves two kinds of sex organs in close or slow action and hitting each organ to the other with small entry, and not a lot.

Sex will involve two kinds of actions normally: intercours and physio course whiles sex without a lot hitting each organ

to the other is termed intercourse. *Intercourse* is sex with a small entry at a close and slow action with the involvement of sex organs. *Physio-course* is a sex with a big entry at close and fast action with the involvement of sex organs.

Each kind of sex can be controlled by a throw-fit sound. Sex can lead to intercourse and intercourse can lead to a physio course. A *transitive sex* is formed in the process. The reverse transitive sex may or not lead to a good fit in a physical relationship. A reverse transitive sex is flagged. It is found in lot of other kind of relationships and a sex spec for tired, weak or lose enthusiasm sex relationship. The transitive sex spec is a source of healthy, strong and gain enthusiasm for physical relationship. Transitive sex is a come-to-go hitting. A transitive sex is a *gape interaction*. A transitive sex is a sense of gain enthusiasm whiles the reverse kind is a sense of eagerness and lose enthusiasm. Sex is a gate-way of

penetration and a line of senses - Joy, Happiness and Health. A general sex is a transitive sex.

An intercourse is geared towards a hit enough whiles a physio course is a get towards a hit a lot. An intercourse is a gear towards a come-to-go movement and a physio course is geared towards a come-to-sleep movement. Both intercourse and physio-course is not kidding edition of sex organ hitting. Each organ is like a gauge once the line of senses is reached then the judgment of falling into a physical relationship is fit enough. Physical relationship gathers a female and male to (a) increase their of line of senses (b) come together (c) find information on their physical course (d) bring things (emotional, healthical, physical, reactional) together, and (f)believe in things that they see, touch or feel.

Physiometry is part of the physical course that deals with the relationships between the line of senses, angles of sex organ hitting/bouncing and surfaces of sex organs, sex place

and sex touch or people touch. A physical body needs a right surface for a physical relationship to come together. A good health is a line of senses to bring joy and happiness together in a physical relationship. A good health brings emotional things together in a physical relationship. A physical body involved in a physical relationship needs to deal with the angles of sex organ hitting. The angles of sex organ bouncing can be at 45 degree downright, 90 degree downright; +0 — 90 degrees z-downright along y-axis, 313 degree downright. The surfaces of sex organ deals with the curvature or bend relation and how they come together in hitting. A smooth surface of sex organ is much desired to reduce tear or wear. A smooth surface can increase line of senses- high joy, high happiness and good health. A soft or fibre surface is also much desired for easy penetration and strong emotion. The surface of the sex place is the place where the hitting and bouncing takes place.

The desired surface is made up of a spring-made bed and a foam-made bed. These beds coming together will bring the right hits and right bounces. The foam made bed is placed on top of the spring made bed and not the other way round. A spring-foamy bed is as flagged bed in a physical relationship. A spring-foamy bed is a bed about a bed- A meta-bed. A meta-bed is a good fit for hitting and bouncing in a physical relationship. A meta-bed is a physical course needed to control a strong sudden physical reaction or emotion.

The physical body is a surface of sex organisms. The back of the physical body, both female and Male needs to be right to get the desired bounce or hit. The sex organisms on the physical body is the source of sense of sex touching in a physical relationship. An intercourse is sex involving the same class type of physical bodies whiles physio course is sex involving the different class of physical bodies. The type can be a mate. Both intercourse and physio course is a classic sex

among class mates. A mate-way is a way of friending somebody in a physical relationship. An intercourse or physio course partner. The intercourse classes will give a mark-account of the member of hit enough in a physical relationship whiles a physio course classes will give a mark-account of the member of hit lots in a physical relationship. The classification of an intercourse or physio course will be classified on the number quality of the physio-metric line of senses, physio metric angles of sex organ hitting or bouncing and physio metric surfaces of sex organs, sex place, sex touch or people touch. The collection of these data (physio-metric data) will be a service of physical course. It will give a correct action in a physical course for people in a physical relationship. The physio-metric data on a physical course will be a source of money generated on commissions. A physical course can cultivate the habit to stay on life with all things. A physical course can be a habitation for physical control in

calm-character chamber for a Chaotic turbulence in a physical universe. The enrichment of the people involved in physical relationship is a deity gift. People involved in a physical course sometimes chooses to touch with the sex organ hand to increase or decrease the line of senses or hit mainly with a love stone(slove) to design a physical stop in a relationship. The slove is built from the pain developed in the female-sex organs during physical intercourse or physio course. It is like a tear of a painful part of the physical body especially the female sex organ. It is useful sometimes when the female wants to store a line of senses in the male physical body. It is a source used by the female to be able to detect the face of the male in a physical universe and investigates further their biographics(sex, height, name, age , hand size, male set length etc). Female will sometimes want to determine the line of travel of the senses and may drop a stone near male's sex organs, chest, rips, palm, head (fore,

top) etc. The careful placement of the stone needs to be done in a conscious mind by the female and an unconscious mind of a female is extremely dicey on a count of 1-6 stones. Males sees the stone as a source of distress request from the female to relax for a couple of minutes. The area of the female sex organ can have a line of travel to the male sex organ only via an imaginary line of senses (joy, happiness and health).

The distribution of hits , internist (intercourse) and physiohits(physiocourse) is for the ageing that cannot stay off a joy contention for their sex organs. The yield of joy contentions have to be generated by a physical body aged about 23-45 years before the need to distribute. This is the transportation of joy contention and it is a physical course. It can be trained to the youth who do not want to engage or commit to any physical relationship. The female youth who engage in bounces is fehitter and the male youth engage in hittings is a me-hitter. The commissioner of the household

that wants a fehitter is a bounce-maker and that of the household that wants a mahitter is hit-maker.

The surface of sex touch deals with the action of putting your hand or physical body somebody or something. The physical course is the treatise in their mission. We will come back to it later. Lets us now look at physical appearance.

Firstly, physical appearance is a reason for two physical bodies to play any interaction or activity of physical relationship. A physical appearance is an action somebody chooses that involves people hitting or touching each other a lot. The physical course of a physical appearance is the main source of development in a physical universe. The way that the physical body look is a physical appearance. Physical appearance will make a person to begin to be seen as a fahitter or a mahitter. Fahitter or mahitter will appear to draw physical attention in a physical universe. The physical attention can be a universal attention. The looks of a female's

physical body can be hair, hands(small palms, large palms, cute female, big palm, long hands- angel female), buttock(huge back, slim back), legs (short, long), face(straight, appeal, make, famous, fancy) or skin(white, brown, black, red). The looks of a male's physical body can be hands(small palm, short back-little man, big palm, long hands-giant man), height(tall, short), chest(broad, narrow), head(small, big), sex organ(short-magical man, long, power or big man) or face(trimmy hair face- pretty man, total-shave hair- gentleman). A physical man is a male who fights to get a physical attention for his looks. A physical woman is a female who fights to get a physical attention for her looks. A big man normally also have a fatty stomach and the other have a flabby stomach- a little or small man. Physical attention is also a game played that cause a physical relationship to become real and to be seen. A person can be felt of demanding a physical relationship if other has a good

physical appearance. Hitting is known to cause the female especially to become beautiful a desired physical appearance. A physical course is a good way of improving a physical body in order to enhance the physical appearance. Those that ends up in baby labour can increase in body size(skin female) and a big female can reduce its body size in physiocourse (different sex orientations). The third reason of physical relationship involvement is physical attraction. An adorable physical body is the physical attraction of a physical relationship. Adoration is a physical game which people play feeling a great love and respect for someone. The female is admired by the the male for her's physical attraction in a physical relationship. The surface of the sex place needs to be physically attractive. A main cause for physical relationship is the other like for a physical attractive body. The field of physical attraction is mainly held by the female and emission of joy to the male can cause a physical course in a physical

relationship. The emission of joy by a female to a male to cause a physical course is called Sexual Emission. The sexual emission is the transmission of attractive joy between the male and the female sex organs. There is an occasion of transmission between the hearts of both females and males via either close or distant breathing. Joy is a felt temperature risen at the heart or sex organ parts. Joy is a felt excitement and it is a one-way transmission initiated by the female. The female is the transmitter of joy and the male is a receiver of joy. The physical relationship between the female and male is based on the level of excitement caused mainly first by the female than the male. The male sex organ rises from rest state to an erect state after the received sexual joy in the female emission. The speed of the erection excites the female and may want to bounce or hit. The erection can be short or long-lived time. An erection can be regulated on a level of excitement in the sexual emission. A level of excitement in

the sexual emission can be a count after each hit or bounce that rises from rest state.

Physical attraction can cause a male sex organ at rest state to more against gravity to an erect state due ti the sexual emissions. A line of sense is created from the sexual emission between a female sex organ and a male sex organ. The line of sense is an imaginary tube for transmission of sexual joy from the female to the male. The line of sense is a gravity of sexual joy. The sense-line is a force that pulls or keeps the joy things together. With the physical attraction, two physical bodies can be involved in a physical relationship. The size of one's sense line differs from the the hole size of the female sex organ or the male's sex organ. The attachment of the male's sex organ to the female's sex organ is through the sense tube(imaginary tube). The sense tube of a female sex organ can expand to accommodate an unfit sex organ of the male. A long male's sex organ can be inserted into a female's sex

organ in a suspension state-in upright erection state. A gap is left between a female's sex organ and male's sex organ in horizontal erection state. The suspension state and the horizontal state is a physical course in hitting. The suspension state is a vertical pull and push alternations in a physical course needs whiles the horizontal state is only horizontal pull and push alternations in a physical course. The suspension state in a physical course helps to reduce the love emission from the female's sex organ. The suspension state holds the female in a position that occupies some of the strength in the mind in so doing preventing the creation of a love. The horizontal state is the opposite to the suspension state. A big erection of the male's sex organ is needed in a suspension state. A physical course is the awareness of a big erection in a suspension state.

A best erection is achieved if a boom level of excitement is sent by the female's sex organ via sexual emission. A low

level of excitement by the female will create a hard male's sex organ without the enough erection. Grading a low level can. Determine the measure of hardness of a male's sex organ. A hard male's sex organ is like an inflated ballon that loses it's grade of hardness if there is a little lost of excitement in the air. The male's sex organ is a bag of inflated skin balls in secretion with responsive hardness and erectness due to excitement of sexual emission. The male's ex organ can get cold and hot sometimes. The excitement of male's sex organ by sexual emission can cause a hot state. The cold state can cool down the hot state of male's sex organ due to the environ influence to balance the effect, strength and amount of high temperature. The state changes can calm the two physical bodies or help them to sleep. This is *barbituration*. The rate of barbiturate of the two physical bodies is due to the states of temperature changes. A high barbiturate means a high state change in temperature and a

low barbiturate means aa low state change in temperature. A high barbiturate is due to a low temperature amount whiles a low barbiturate is due to low temperature. The basics of barbituration are the three principles stated above.

The idea of a physical relationship may be base on the operation of battery- A male's sex organ fits into a female's sex organ and supplies the female with a sperm as basics of pregnancy. A physical battery is made up of physical cells or series of sperm cells. The female's sex organ has a sexual battery that supplies the physical cells or sex cells that contains the joy or sexual joys. At full excitement state of the sexual battery of the female's sex organ, an ejaculation sexual joy is sent to the physical battery of the male's sex organ for the release of sperm cells or series of stem cells. A meta-beed is an environ influencer in barbituration. The course of drinking can be an enviro influencer in barbituration. Barbituration is an ends-to-means to a physical course. The

physical behaviour is a way that the sperm substance reacts in a particular conditions in the female's sex organ. The physical behaviour is a physical course. The sperm substance is a protein digest in a physical universe and may not cause pregnancy.

But the Theologians have a different story to tell the scientist or engineers. The protein digest can be the sperm cells and the immediate food substances taken into the stomach. The protein digest is experienced as hunger when the female's sex organ sucks in the sperm substance of protein substance or digest. The protein digest is sucked at sex-stone interval of time. This means that protein digest is sucked when the female's sex organ releases a store due to stress. A five sex-stone release can cause a five times protein digest sucking. The sucking helps open the female's sex organ and de-stress the opening of the female's sex organ. The sucking in turn exited the female and causes a more harder

male's sex organ, and more enough erection than more ejaculation by further senses. A suck can be a big digestion or small digestion in both physical bodies. Some people holds its as a statement of engaging the female to visit the male to cook for the male after a big digestion. A big digestion is a condition of needing a female's presence at a male's home. Sucking at big digestion is a source of physical course. Sucking at small-digestion is a means to start straying in some drink and a big digestion starts a means to eat a meal at lunch or after lunch. A sex legalist argues that if the female can cause that to happen then the female owes the male bills.

A *physical bill* is a written that shows how much money the female owes the male for the good of big or small digestion. This setup is a spin business. Males can request for a physical bill at the physical court. A high bill request can be result into a short or long term physical relationship. A physical billing is a development of physical course by the

males. Some believes it is a test of the female's cooking if it sweet enough to engage the female on a permanent (life) marriage. It can last for 6months -2 years in a physical relationship. A Physical or Fiscal Economist can argue that the buying and selling of goods or services without money traded as a physical course can attract a physical bill or money between the buyers and sellers. A physical money request is a physical course in physical universe. The buyer bleeds as a term to mean that the buyer causes the physical money flowing to the sellers across a globe or country. A buyer choosing not to bleed then blemish the economy of the seller. The seller will then bleat and that means to complain in a weak voice, when the seller bleats in weak voice, then the buyer will bleach the country's flag colours and the buyer will then go blind meaning the buyer will unable to admit different sellers to their physical market. A physical market is the place of illegal trade of goods via a physical course with a

lost of physical money or defecting payment of physical bills. The phenomenon of a country going blind on their physical market is termed blind spot. A physical security is then put in place to block the voices from transmitting a good or services. A blockade is officiated by the country. A country or individual blossoms if the buyer causes a lot of bleeds. A blind buyer causes a blunder(careless and embarrassing mistake). A blunder for the seller will as bog (become so individual with one good or service that you cannot make any progress).

Sex touching is a physical game in a physical course. Making a physical contact by the palm, hair, eyes, feet, sex organ and lips in a physical course is a physical game. Sometimes the physical body of the male and female seems not real in the sense of responding to joy emissions. A physical game is needed to make it feel real again in response. A game of touch with the hand along the contours

of the physical body of both males and females will be desired. Eyes contact between the physical bodies is a physical game to play to high response to joy stimuli.

Each contacts in a physical game will give a foot-print responsive of joy stimuli. The sex organs contacting each other in a physical game will be lipping contacts of the physical bodies and it can give an increase in length of the male's sex organ, and a better conditioning of the female's sex organ for good joy stimuli.

The lips can touch many parts of the physical body like the lip-2-lip, lip-2-bicep, lip-2-forehead, lip-2-eyes, lip-2-chest, lip-2-tongue, lip-2-finger etc. Each of the lipping techniques is a hit treatment for physical bodies in a physical course. Unfelt parts of the physical body can be felt by a lipping method.

A physical treatment can be achieved with a sex organ contact, eyes contact, feet contact and hair contact. Sex

touching is an action somebody chooses that involve people touching each other a lot
